

Experiment-04 Home Tasks

Tasks:

Complete the questions given below:

- A. <https://datalemur.com/questions/product-line-profit>
- B. <https://datalemur.com/questions/international-call-percentage>

Tools / Platform Used:

- Windows
- Chrome Browser
- Datalemur.com

Code and Output:

A.

Question not found [Error 404]

B.

A screenshot of the DataLemur website showing the 'International Call Percentage' question. The header is similar to the previous screenshot. The question title is 'International Call Percentage' with a subtitle 'Verizon SQL Interview Question'. Below the title are tabs for 'Question', 'Solution', 'Discussion', and 'Submissions'. The 'Question' tab is active, showing a green 'Accepted' status and a congratulatory message. The question text asks for the percentage of international calls. The 'Output' section shows the expected result '54.5'. The 'Solution' section shows a PostgreSQL query. The 'Input' section shows the query being executed. The 'Output' section shows the result '54.5'.

International Call Percentage
Verizon SQL Interview Question

Question Solution Discussion Submissions

Accepted

Output

international_calls_pct
54.5

Expected

international_calls_pct
54.5

Input PostgreSQL 14

```
1 SELECT ROUND(
2     100.0 * COUNT(*) FILTER (
3         WHERE c.country_id <> r.country_id
4     ) / COUNT(*),
5     1) AS international_calls_pct
6 FROM phone_calls pc
7 JOIN phone_info c
8 ON pc.caller_id = c.caller_id
9 JOIN phone_info r
10 ON pc.receiver_id = r.caller_id;
```

Output

international_calls_pct
54.5

Run Code Submit

Result:

The queries for the given tasks were written and executed successfully. The tasks given were completed successfully.

Learning Outcomes:

- Practiced PostgreSQL
- Got hands-on experience on working with Switch-Case Statements in PostgreSQL.
- Practiced commands of Switch-Case in PostgreSQL.
